

OFFERED FOR SALE BY

2022 BELL 429

BELL 429

Now offering this new **Bell 429 GlobalRanger**, a light twin-engine helicopter capable of single-pilot IFR and Runway Category A operations. This helicopter features a composite and aluminium structure and has a high power to weight ratio required in high-altitude power settings used in mountain areas.

The Bell 429 has a four-bladed rotor system that provides a smooth ride, reducing vibration and noise levels. Also the Bell 429 is equipped with twin powerful engines that can fly at a maximum speed of 155 knots (287 km/h). This makes it one of the fastest helicopters in its class. It is equipped with a standard autopilot with control of pitch, yaw and roll, and an added autopilot for thrust control (4 Axis Autopilot).

Its cabin accommodates 5 VIP Corporate Passengers and seating includes a Club With 1 Center Console and Side Arm Rests. The cabin is also designed with large windows that offer a great view for passengers. The beautifully painted dark black exterior offers a nice contrast to the light beige interior.
